Claim intake.

Fill this out with the homeowner so the crew arrives ready to document instead of doing paperwork on the doorstep. Everything here is the homeowner's own claim information. **We do not file or negotiate the claim.**

What happens next. We inspect and photograph the roof at no cost and give you a written assessment either way. If there is damage worth filing, **you** file the claim with your carrier. Texas law does not allow your contractor to do that for you. When your adjuster comes out, we meet them on site with our photos

and measurements so nothing legitimate is missed. What your policy covers, and what you owe, is between you and your insurance company.
